

THREAT ANALYSIS REPORT

Target Domain	halkbankparaf-para.com
Classification	Phishing / Brand Impersonation
Primary IP Vector	35.203.251.54
Report date	20-may-2026

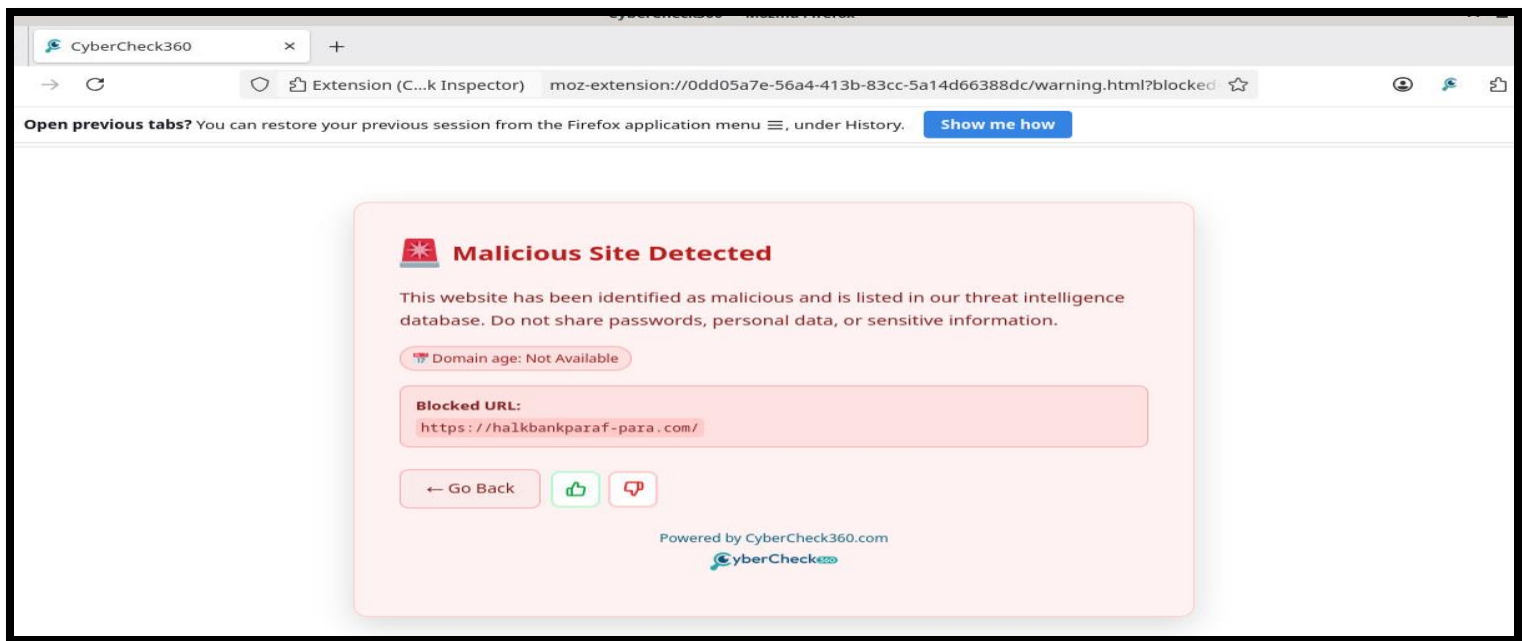

1. Threat Report (VirusTotal)

Multi-engine security telemetry logs indicate that the primary target domain has been flagged explicitly by the global threat intelligence community.

Security Vendor	Analysis Classification	Threat Indication Summary
BitDefender	Phishing	Malicious portal designed for banking credential interception.
CyRadar	Phishing	Rerouted web request flag matching hostile patterns.
G-Data	Phishing	Database signature entry match for deceptive web resources.
ADMINUSLabs	Malicious	Malicious network node deployment pattern.
Forcepoint ThreatSeeker	Malicious	Reputation block listing based on high-risk domain anomalies.
alphaMountain.ai	Suspicious	Dynamic behavioral scoring flags risk thresholds.

Resolved IP Vector: The address resolves directly to 35.203.251.54, identifying Google Cloud Engine (GCP) resources as the execution node. Threat actors abuse these reputable cloud layers to pass baseline reputation checks of corporate firewalls.

(Tried opening in a isolated Sand Box Environment)

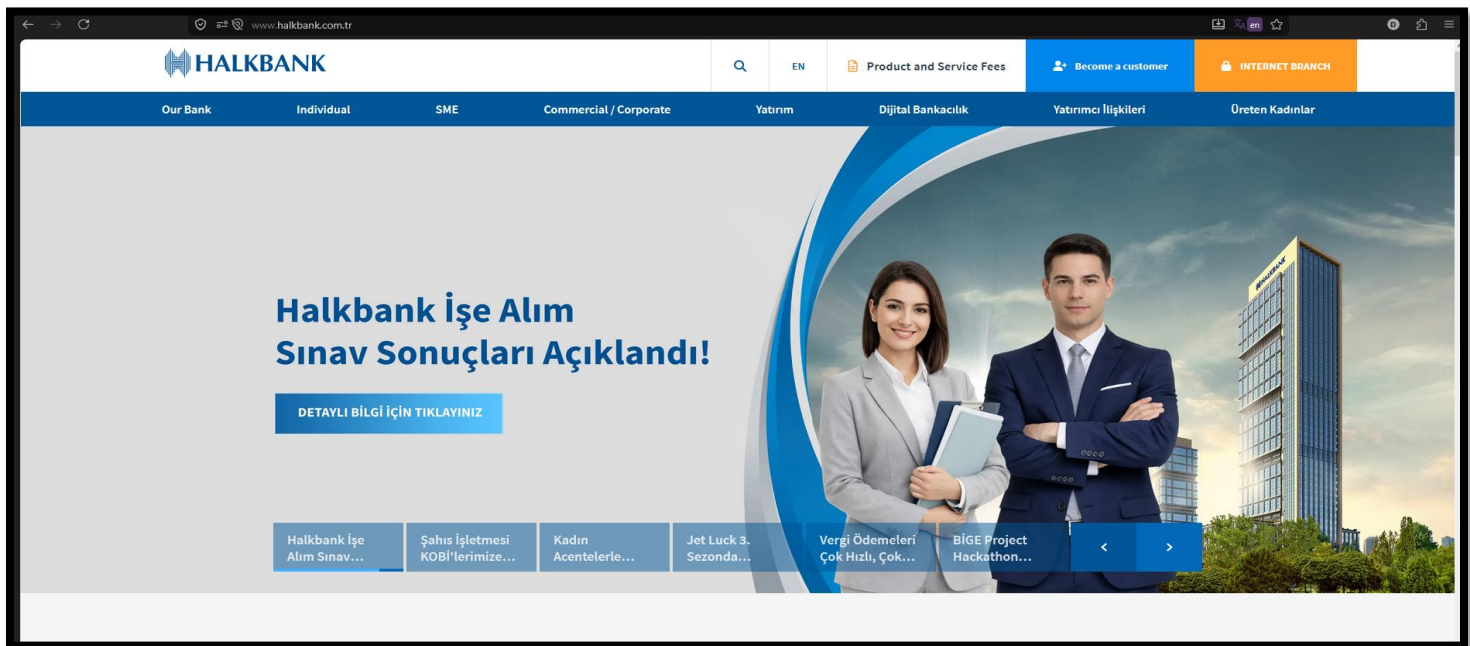

- **Configured Nameservers**

DROPTISHOST-46B7BA85-41EE-4677-9B93-A2603F135042.BIZ

DROPTISHOST-C56E7088-1C81-42DB-9FA2-0B39A25BFC9D.BIZ

No real bank would have server of names like this.

The official domain for the bank—**halkbank.com.tr**—was first registered at the beginning of **1999**.

(Original Bank Website)

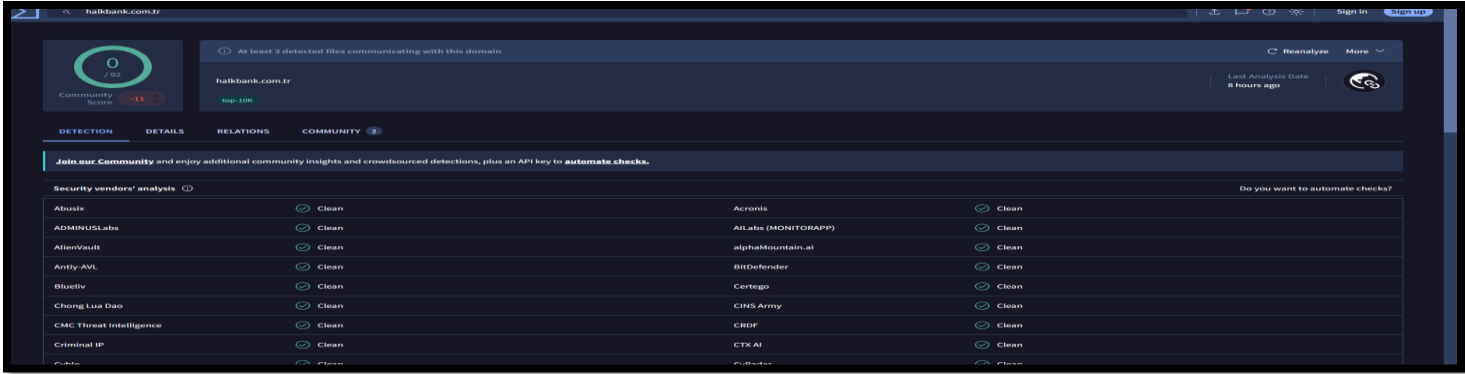

the real bank's fully integrated, automated retail internet banking system went live following its acquisition and merger with Pamukbank in **2004**..

1. Domain Registration: January 1999

The official domain for the bank—**halkbank.com.tr**—was first registered at the beginning of **1999**.

2. Modern Online Infrastructure Launch: 2004

While basic web updates were present in the early 2000s, the real bank's fully integrated, automated retail internet banking system went live following its acquisition and merger with Pamuk bank in **2004**.

(Original Bank Virus Total Summary)

Trait	The Real Bank Infrastructure(halkbank.com.tr)	The Phishing Infrastructure (halkbankpara-para.com)
Domain Setup	Registered in 1999 ; renewed continuously for decades.	Registered in 2018 ; abandoned immediately in 2019 .
Server Hosting	Highly secure, localized, closed-circuit banking data centers.	Stood up as a disposable VM on commercial Google Cloud Platform .
Routing Protocol	Proprietary, authenticated internal institutional nameservers.	Routed through suspicious, temporary nodes labeled DROPTHISHOST .
